PLEASE NOTE:

Antiqued Stone only supply natural stones and no two pieces are exactly alike. There will be variations in marking and shading and there may be small variations in all dimensions. The material should be looked at to establish colour and marking characteristics and we recommend you view your pattern with your installer prior to the stone being fixed and, if it's a random pattern, shuffle to get the desired effect.

The stone may be wet when it arrives on site. It will take some time to dry and lighten to its true colour.
